What is Open Access?

“By “open access” to [peer-reviewed research literature], we mean its **free** availability on the **public** internet, permitting any users to **read, download, copy, distribute, print**, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or **use** them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself.”

(Budapest Open Access Initiative, <https://www.budapestopenaccessinitiative.org/boai-10-recommendations>)

Open Access Myth? Busted!

„Open Access always costs a lot of money.“

PUBLISHING costs money.
Traditionally, costs were covered by subscriptions or purchase prices. These financial models are being replaced by gold and diamond Open Access.
BUT: how much profit should be carried by universities and authors?
AND: green Open Access is free of charge!
