

Overview of Subject-Specific Qualifications

Master's Program in Economics (M.Sc.)

Surname, first name:

Date of Birth:

Application number (see VIBS portal):

GPA/final grade (as stated in the Transcript of Records):

GPA/final grade converted to the German grading system:

For conversion please use the [University of Augsburg's grade conversion calculator](#) and upload a document describing your university's grading system to VIBS.

Name of the university at which the qualifications were obtained:

Degree program in which the qualifications were obtained:

For **non-European universities**: Factor used to convert credits into the ECTS system:

- Please enter in the tables below all successfully completed modules from your previous studies that demonstrate the subject-specific qualifications required for the Master's program in Economics. These comprise at least 40 ECTS credits from basic and advanced economics modules (Table 1) and at least 15 ECTS credits from relevant methodological modules (Table 2). Further information on the allocation of modules can be found at: <https://www.uni-augsburg.de/en/fakultaet/wiwi/studienangebot/economics-msc/>.
- Only list modules that are also included in your Transcript of Records and that you would like to have assessed for the respective subject area. You may list modules amounting to more than the required 40 or 15 ECTS credits to account for the possibility that individual modules may not meet the relevant criteria and therefore cannot be counted towards the respective requirement.
- To convert credits obtained at non-European universities into the ECTS system, please refer to the table provided by the International Office of the University of Augsburg at: <https://www.uni-augsburg.de/de/studium/ausland/studium/leistungsanerkennung/>. If your country is not listed, please upload an official document to VIBS stating the workload required to obtain one credit at your university. For the conversion, one ECTS credit corresponds to a workload of 30 hours.

Table 1: Evidence of at least 40 ECTS credits from basic and advanced Economics modules

Examples include Applied Microeconomics, Macroeconomics, and Public Finance.

Module title	Non-ECTS Credits (if applicable)	ECTS
Total		

Table 2: Evidence of at least 15 ECTS credits from relevant methodological modules

Relevant subjects include Mathematics, Statistics, Empirical Economics, and Econometrics.

Module title	Credits	ECTS
