What is Open Access?

“By “open access” to [peer-reviewed research literature], we mean its **free** availability on the **public** internet, permitting any users to **read, download, copy, distribute, print**, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or **use** them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself.”

(Budapest Open Access Initiative, <https://www.budapestopenaccessinitiative.org/boai-10-recommendations>)

Overview: the three most common Open Access colours

Open Access licences

- Creative Commons = CC
 - BY= Attribution
 - NC= NonCommercial
 - ND= NoDerivatives
 - SA= ShareAlike
- Combination of attributes creates 6 standard licences
- Options vary by journal
- CC-BY required by some funders
- <http://creativecommons.org/licenses/>

Open Access licences – how do I best share my research?

⌚ journal articles, widest possible distribution and reuse, meets funder requirements: CC-BY

⌚ books / edited volumes: CC-BY-NC or CC-BY-SA, to avoid commercial reuse

➤ CC licence „Licence chooser“:
<https://creativecommons.org/choose/?lang=en>

➤ open-access.network:
<https://open-access.network/en/information/legal-issues/licences>

Open Access licences – what to watch out for

- ⌚ BEWARE: respect any third party rights in your paper (pictures, graphics, charts...)
- ⌚ some publishers have their own Open Access licences („author choice“, „open licence“) – conditions vary hugely
- ⌚ free of charge on the publisher's website ≠ reuse, distribution etc. allowed

Open Access Myth? Busted!

Plagiarism has always been possible.
The availability online makes it much
more ***visible and easier to discover!***

Open Access licences provide authors
with ***more control*** over subsequent
reuse.

„The free availability online
fosters plagiarism and authors
lose control over subsequent
reuse.“
