Research on Learning and Instruction

An Interdisciplinary Program

Master of Arts

How can learning environments be designed to facilitate quality learning outcomes?

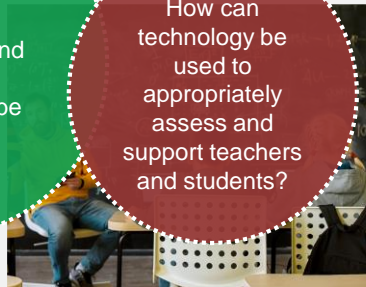

How can teaching and learning processes be improved through the use of media? How must media be designed for this?

How can the heterogeneity of learners be used productively?

How can students' motivations and emotional experiences be promoted?

How can technology be used to appropriately assess and support teachers and students?

Research on Learning and Instruction

An Interdisciplinary Program

Master of Arts

Aims

- In this Master's program, students acquire profound knowledge and skills related to research on learning and instruction.
- Through this—and under the guidance of highly qualified instructors—they produce knowledge that is urgently needed in educational practice.

Who is the target group?

Graduates from:

- Teacher Education programs
- Bachelor's programs related to research on learning and instruction (e.g., education, psychology, communication science)

What are the main topics?

- Cognitive and instructional processes
- Motivational and emotional processes
- Teaching and learning with media
- Teacher professionalism and heterogeneity
- Technology-supported assessment and facilitation of learning and instruction

Professors:

Prof. Dr. Klaus Bredl

Prof. Dr. Markus Dresel (Spokesperson)

Prof. Dr. Andreas Gegenfurtner

Prof. Dr. Anja Göritz

Prof. Dr. Andreas Hartinger

Prof. Dr. Ingo Kollar (Spokesperson)

Prof. Dr. Eva Matthes

Prof. Dr. Ulrike Nett

Prof. Dr. Michael Sailer

Prof. Dr. Klaus Zierer

Research on Learning and Instruction

An Interdisciplinary Program

Master of Arts

What is special about the program?

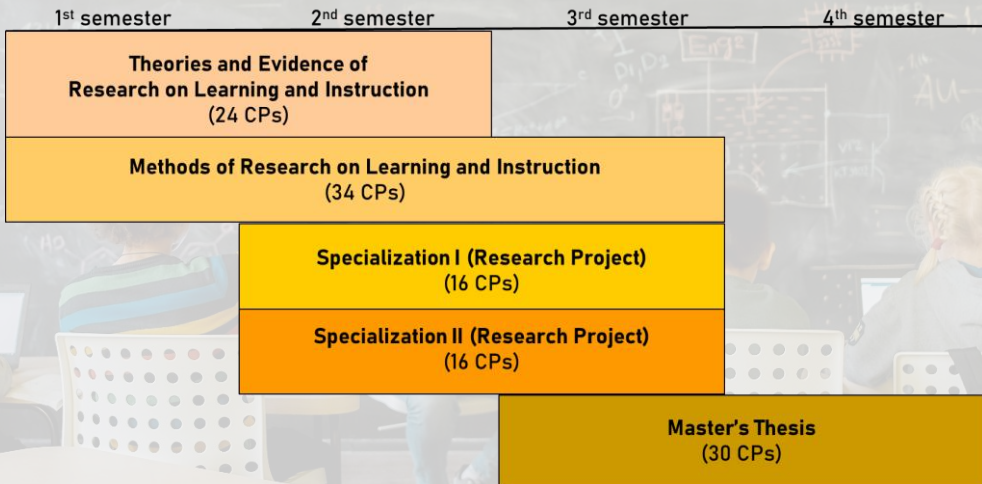

- **Strong research orientation:** The teaching concept strongly mirrors the process of empirical research. Students not only discuss, but also produce empirical evidence on the conditions, processes, and effects of learning and instruction
- **Interdisciplinary focus:** The courses take psychological and educational perspectives on learning and instruction. In addition, perspectives from various subject matter didactics and media didactics are included.
- **Internationalization:** The students are encouraged to travel to international conferences and to go for research stays abroad.
- **Intensive guidance:** Students' research projects are closely supervised by the instructors, with an excellent instructor-to-student ratio. There are also plenty of opportunities for interaction and discussion outside of the boundaries of the courses.
- **Innovative course formats:** The students receive plenty of high-level learning opportunities in authentic contexts.

Why study in Augsburg?

- Medium-sized city with a lively past and a booming present
- Offers a high quality of life and plenty of attractive career opportunities
- Part of the Munich Metropolitan Area in an attractive region in the Alpine foothills
- Augsburg offers affordable housing opportunities.
- Students benefit from the amenities that a campus university entails.
- All facilities are in a compact location, which includes a spacious park landscape and a relaxed, but focused study atmosphere.
